1 · Lab data files / measurement files

`measurements`

laboratory data files for all demagnetization steps, with the metadata needed to convert them into the MagIC measurements table (e.g., with PmagPy or Paleomagnetism.org)

Supplied with the files

Contribution	**Reference** `contribution.reference` · **Laboratory** `contribution.lab_names`
Files	**Data files** · **Data file DOI** · **File format**
Instrument	Instrument `instrument_codes` · **n orientations** `meas_n_orient`
Orientation	**Core orientation convention** · **Declination correction** `samples.azimuth_dec_correction`

Yielded by conversion (MagIC measurements table)

Names	**Specimen** `specimen`
Step	Step no. `treat_step_num` · **Treatment** `method_codes` · **Temperature** `treat_temp` · **AF peak field** `treat_ac_field`
Magnetization	**Moment** `magn_moment` · **Dec, Inc** `dir_dec, dir_inc` · CSD `dir_csd`
Quality b for steps excluded from fits	**Good / bad data** `quality`

2 · Specimen directions

`specimens · samples`

all fits, with sample orientation and bedding

Names	**Location** `sites.location` · **Site** `site` · **Sample** `sample` · **Specimen** `specimen`
Position	**Strat. height** `height`
Sample orientation	**Azimuth** `azimuth` · **Dip** `dip` · **Methods** `method_codes`
Bedding	**Dip direction** `bed_dip_direction` · **Dip** `bed_dip`
Specimen	**Volume** `volume` · **Demag. type** `method_codes`
Fit	**Component** `dir_comp` · **Fit type** `method_codes` · **Step min** `meas_step_min` · **Step max** `meas_step_max` · **n steps** `dir_n_measurements` · **MAD** `dir_mad_free` · DANG `dir_dang`
Direction	**Dec, Inc specimen** `dir_dec, dir_inc · tilt = -1` · **Dec, Inc geographic** `dir_dec, dir_inc · tilt = 0` · **Dec, Inc tilt-corrected** `dir_dec, dir_inc · tilt = 100`
Result	**Used in site mean** `result_quality` · **Reason / note** `description` · **Software** `software_packages`

Data standard fields

Each field is shown with the associated MagIC column

- **Field name** `magic_column` — Required by MagIC and this standard
- **Field name** `magic_column` — Required by this standard
- **Field name** `magic_column` — Required by this standard, if applicable
- Field name `magic_column` — Recommended

3 · Site means

`sites`

means calculated from sample/specimen fits

Names	**Location** `location` · **Site** `site`
Geology	**Geologic class** `geologic_classes` · **Geologic type** `geologic_types` · **Lithology** `lithologies`
Position	**Lat** `lat` · **Lon** `lon` · **Strat. height** `height`
Age age, or min and max	**Age** `age` · **Age min** `age_low` · **Age max** `age_high` · **Unit** `age_unit` · **Age methods** `ages.method_codes`
Bedding	**Dip direction** `bed_dip_direction` · **Dip** `bed_dip`
Mean	**Component** `dir_comp_name` · **n lines** `dir_n_specimens_lines` · **n planes** `dir_n_specimens_planes`
Direction	**Dec, Inc geographic** `dir_dec, dir_inc · tilt = 0` · **Dec, Inc tilt-corrected** `dir_dec, dir_inc · tilt = 100`
Statistics	**k** `dir_k` · **α95** `dir_alpha95` · R `dir_r`
VGP	**Polarity** `dir_polarity` · **VGP lat** `vgp_lat` · **VGP lon** `vgp_lon` · dp `vgp_dp` · dm `vgp_dm`
Result	**Methods** `method_codes`

4 · Poles

`locations`

paleomagnetic pole from collection of sites

Names	**Location** `location` · **Result name** `result_name` · **Location type** `location_type`
Geology	**Geologic class** `geologic_classes` · **Lithology** `lithologies`
Study region bounds	**Lat S** `lat_s` · **Lat N** `lat_n` · **Lon W** `lon_w` · **Lon E** `lon_e`
Age age, or min and max	**Age** `age` · **Age min** `age_low` · **Age max** `age_high` · **Unit** `age_unit`
Pole	**Component** `pole_comp_name` · **Sites used** `sites` · **N** `pole_n_sites` · **Coord.** `dir_tilt_correction` · **Plat** `pole_lat` · **Plon** `pole_lon` · **K** `pole_k` · **A95** `pole_alpha95` · **Ellipse** `pole_conf` · North / south `dir_polarity` · Paleolatitude `paleolat`
Flattening	**f** `pole_flattening` · **f low** `pole_flat_low` · **f high** `pole_flat_high` · Inc `dir_inc` · Corr. inc low `dir_inc_flat_low` · Corr. inc high `dir_inc_flat_high`
Field tests	Reversal `reversal_test` · Reversed % `pole_reversed_perc` · Fold `fold_test` · Conglomerate `conglomerate_test` · Contact `contact_test`
Tectonics	Plate / block `plate_blocks`
Result	**Methods** `method_codes`

5 · Ages

`ages`

age constraints and their basis

Names at least one	**Location** `location` · **Site** `site`
Age	Age `age` · Age ± `age_sigma` · Age min `age_low` · Age max `age_high` · Unit `age_unit` · **Methods** `method_codes` · **Timescale** `timescale_citations` · Basis / note `description`
Source	**Citation** `citations`
